**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This paper hypothesizes that watershed management projects which have been performed by the municipalities generated satisfactory reflections among farmers related to the positive impacts of the watershed programs in farm productions and job opportunities. It concludes that such programs are helpful in sustainable development of the communities and should be performed. The idea is interesting to increase water resources with the help of watershed procedures in West Bengal to meet more farm incomes and more jobs. 1 First present the project well and declare what does the Cooch Bahar Municipality do? Explain the term of "Watershed development program". What activities are included in the program in terms of Watershed by flooding, watershed by topographic distance or topologies, watershed with the help of a drop of water principle, etc.? 2 Second, list the expected outcomes such as increasing farm outcomes and job opportunities, etc. , more detailed and assess those 3 Third, introduce the area of case study with a suitable map and describe the climate and hydrological droughts. 4 Table 1 is mixed with uncatchable data. Redesign it. 5 What is really your contribution to the problems such as water resources shortage, improvement of watersheds, water management, and the role of different actors and NGOs? What other readers would learn from your research? Develop the concluding	Watershed development project is a centrally sponsored scheme and undertaken in watershed basis, not by any Municipality in India. Geographical position (Lat-Long) with Map is included. Table-1 is changed The research is on the hypothesis that watershed dev. Project not only impact on physical

	part regarding the question. 6 There are grammatical and dictation mistakes in the writing of the article, which should be corrected throughout the article. 7. References are old. There are numerous new helpful recently published works in this field you should review and use. Good luck	parameters but also may affect psychological parameters like attitude; and it is shown in the study. Necessary corrections made as per the suggestion and new references added
