PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The article is quite original and innovative based on sound methodology and data gathered by the author. The results shown are conclusive and supported by evidence and the different tables provided within the article. The scope of study is perfectly defined and developed.	Thank you
<u>Minor</u> REVISION comments	Besides some minor errors, the author should not forget to mention the referenced authors within the text whenever mentioned.	Thank you for this. I have included the referenced authors within the text and highlighted them in yellow.
<u>Optional/General</u> comments	Both introduction and conclusion, though suitable and well defined, are a bit scarce in their development and should be somehow fostered.	Thank you. For the conclusion I have included some sentences on how increase in asset ownership can improve welfare and I also included a good recommendation.
