

Editor's Comments:

Thank you very much for checking again the manuscript. However, I suggested writing all equations or letter by Equation editor in section 3. Now, I have corrected in subsection **3.1.1.1. Concentration Rate** (given in yellow mark) and send back to you (attached file). It is suggested to complete the remaining sections. Furthermore, in each subsection, there is an equation number (1). It is suggested to continue the equation numbers subsequently like (1), (2), (3) and so on.

Author's Feedback:

Thank you very much for your advice. I have rewritten the equations using equation editor and corrected the equation numbers as you mentioned.
