PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The lack of correct grammar embedded throughout this manuscript precludes its inclusion in any serious journal. While the approach is interesting and information gleaned could be useful to farmers and other land managers in Jordan, its presentation is in need of serious improvement. Additional effort should be placed on more in depth discussion of your methodology. Finally, the sample size (farmers sampled) is extremely low and is not high enough to legitimately make any conclusions.	In case of Grammer: Abstract Lines 8-19: Rewritten again. Introduction Line 29 modified by replicating (its). Introduction 35 + 36: modified by adding (growth and already). 		Line 222: Suffered Line 223: , Line 226: Survived instead of survive Line 228: Sources instead of source Line 241: Towards instead of Toward Line 243: weed Line 244: Change sentence Line 249 – 253: several changes In case of sample size (Lines 80, 83, 115, 120, 152): The first field survey in Wadi Dlayal was 19.15 ha and the final sampling questionnaire directed to 18.6 ha. The total land is 55 ha. The sampling % in both cases were 35 % and 34 % respectively. The second field survey in Kherbeh sides was 56.4 ha and the final sampling questionnaire directed to area of 56.4 ha. The total land was 370 ha. The percentages of sampling were 15.3 % in both cases. I think that sampling of 15 % was minimum and that make sense. I s not it ?
