General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The author presents a very interesting and extensive study, but some questions remain to be clarified. For example, it is unclear what level of reliability and generality of results, if the study was conducted on the material of the population of only two villages.	Review has been done
<u>Minor</u> REVISION comments	The criteria for choosing the number of questionnaires and respondents are unclear.	Review has been done
<u>Optional/General</u> comments	It is expedient to estimate the obtained results for autocorrelation using the Durbin-Watson statistics	As far I know the Durbin-Watson autocorrelation is not necessary to test in this model.
