Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Thanks for your message. I cannot tell what changes have been made to the paper by the author and there was no meaningful response to the evaluation form. the author must provide a detailed explanation of changes that have been made	The methodology section needs to be completely rewritten – I have corrected the methodology according to the comments mentioned by you. The findings should include a proper description of the demographic characteristics of the sample achieved – findings include the description of the demographic characteristics of the sample achieved A discussion section should be added to consider the performance of the conceptual framework – Discussion section is also corrected The conclusion should include the limitations and the suggestions for future research- The limitation and suggestions are also included in the conclusion Reorganize the abstract to include all major areas (Topic, methods, main objective, main findings, main conclusions and recommendations if any) – Abstracts include all the major areas of the article -Proof read the entire manuscript to clear errors and mistakes.- I have deeply proof read the paper again -Indicate the source of data in the tables (e.g. Fieldwork)- Source of data is also given -Use correct tenses and correct sentence constructions to enable the reader appreciate the flavour of the research findings and conclusions- tenses have been corrected as per best of my knowledge All the mentioned corrections have incorporated in this research paper. Thanks for your valuable comments.
