

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Agricultural Extension, Economics & Sociology
Manuscript Number:	Ms_AJAEES_37966
Title of the Manuscript:	Factors affecting awareness level of farmers about crop insurance: A case study of Haryana
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
This is a better version of the paper but still not up to the level required. In particular, the tests (for awareness) should be accompanied by tests for statistical significance (e.g. chi square). The measurements should be expressed in international units, not lakhs (or lacs). A discussion section is required in which the findings are discussed in the light of what would be expected from the conceptual framework tht should be provided at the conclusion of the literature review. The methodology section needs more details in every aspect. The paper needs to be edited for language usage.	Methodology has been improved as given suggestion and recommendations. The conclusion section has been also improved as per requirements of the reviewer.
