

### SDI Review Form 1.6

|                          |                                                                      |
|--------------------------|----------------------------------------------------------------------|
| Journal Name:            | <a href="#">British Journal of Economics, Management &amp; Trade</a> |
| Manuscript Number:       | 2014_BJEMT_12499                                                     |
| Title of the Manuscript: | A Review of the Development of High-tech Industries in the World     |
| Type of the Article      | Short Research Article                                               |

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

### **PART 1: Review Comments**

|                                            | Reviewer's comment                                                                                                                                                             | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)                            |
|--------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments | Historical studies should include an extensive literature. So author(s) must provide a complete list of studies and design a table of studies in different various categories. | "Historical studies should include an extensive literature." As for this, I don't quite agree, because mine is only a "Short Research Article", which couldn't include everything and it is unnecessary. |
| <b><u>Minor</u></b> REVISION comments      | Title of the paper is not determined the period of study.                                                                                                                      | The Title of the paper is concise. The comment upon this would be to paint the lily.                                                                                                                     |
| <b><u>Optional/General</u></b> comments    | The resources are not enough and up to date.                                                                                                                                   | I think the resources are enough for this essay.                                                                                                                                                         |
