SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. The topic does not reflect the findings; the findings concentrate on the adoption of farmers on BPS which is not captured on the keywords. I suggest the title to be of farmers' adoption on BPS. 2. The introduction should say a little on the current status of farmers use or not use of the few BPS so as to highlights the extent of the problem. 3. Under the inferential statistics the t-test was not clearly explained in comparing the statistical differences between user and non-user of BPS. I suggest an in depended, t-test must be conducted to come with the correct conclusion on gross margin differences. 4. The world global value chain is vaguely used and not linked to how Nigerian soybean farmer contribute and participate on the global value of chain of the two crops. Whether through exportation or processing.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	The manuscript is good but it need some improvements so as to deliver the correct information to readers and governments.
