PART 1: Review Comments

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**- The abstract should be edited; it should only include the aim of the study, the methodology, and the main findings.** **- The introduction and the conclusion should also be edited; they are not well done.** **- The manuscript needs to be proofed; it still contains too many grammatical blunders.**	
Minor REVISION comments	- Equations should be written with the proper tool (equation tool) included in Microsoft Word software package. The equation tool can be found under "insert" menu. - Tables and Figures should have their source(s) mentioned above them.	
Optional/General comments	This topic is quite interesting and the various techniques reviewed give some credit to the study; but, the language is not suitable for publication.
