

SDI Review Form 1.6

Journal Name:	Asian Journal of Agricultural Extension, Economics & Sociology
Manuscript Number:	Ms_AJAEES_36663
Title of the Manuscript:	Pre extension demonstration and evaluation of hip pump in western Oromia, Ethiopia
Type of the Article	Short Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The author wastes space describing well-know generalities about the importance of water for crop production, but fails to provide key insight of the study area. Need to spell out the acronyms A sampling strategy is mentioned, as well as the application of a semi-structured interview and group and individual discussions. Unfortunately, none of these analytical tools are used to present the results. For readers who do not know the study area, this would be of great help. Thus, the paper seems too basic as it is. It does not stand alone. The author must apply the scientific method (which it seems he has) to provide more robustness to the paper.	
Minor REVISION comments	There are some serious typos.	
Optional/General comments	It is unclear what the purpose of the paper is. The author should state it in the background and justification, instead of filling up around 80 lines with the above mentioned generalities.
