

Editor's Comment:

I have gone through the paper entitled “**Climate Change and Its Effects on Agricultural Outputs in Nigeria**”. Although it is not an original research paper, it can still be published as it contains analysis of data from secondary sources.

I have looked-at the comments of the Reviewers. I am of the opinion that heading “Motivation of the study” should be changed to “Introduction”. Further, on page 4, sub-heading under 2.2 , the writing of year next to sub-section 2.2 creates confusion. It should be written as

“2.2 NIMET 2016 Forecast Evaluation”.

You would agree that two different figures (in close proximity) with different intention/ meaning shall create confusion in the mind of the readers. Similarly, on page 6, it should be written as “2.4 NIMET 2017 Forecast”; and later pages/ places also. I have highlighted it in red font colour.

Another correction is at page 4: related to value of R². I have indicated the same in red font colour.

If these minor changes could be done, then the paper can be and should be published.

I am attaching the final revised manuscript read by me. File name: MAA Revised-ms_AJAEES
