

Editor’s Comment:

Attached please find my comments on the manuscript no. listed above. Please be advised that the research article looks good . Five minor corrections are needed to be addressed.

- The research article looks good. no major corrections are needed. few small notes must be taken into consideration:
- Authors must pay close attention to Punctuation in the text . There are many phrases in the text that need proper punctuation.
- Line 2 in the Abstract, it was stated (. , locally known as haor where 70% crops were damaged as the effect of climate change. It should be corrected to (, locally known as haor, where 70% of the crops were damaged as an effect of climate change
- In the Abstract, it was stated that (..... significant adaptive practices of rice farming while 80% of the respondents were
Also a comma must be placed . (... significant adaptive practices of rice farming, while 80% of the respondents were
- Line 59, it was stated (.... flash flood attacked the haor areas relatively early
I believe that the word attacked does not fit, and should be replaced by covered.

THE TITLE (2. MATERIAL AND METHODS SHOULD BE CORRECTED TO 2. MATERIALS AND METHODS

- Line 130 - it was stated (.... change while the dependent variable was their extent of adaptation of selected farming practices.

THIS LINE NEEDS TO BE DOUBLE CHECKED

LINE 274 IT WAS STATED (farmers with larger farm size are more likely to be adapted these farming practices in response to climate change.

IT SHOULD BE CORRECTED TO (farmers with larger farm size are more likely to adapt these farming practices in response to climate change.

LINE 325 IT WAS STATED (... perception on climate change and their adaptive behaviour was showed in Table 10

SHOULD BE CORRECTED TO (... perception on climate change and their adaptive behaviour was shown in Table 10
