PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The weakest in the paper is the discussion bit. While the author made a bold attempt to respond to my suggestions, the revision is still not satisfactory. I was expecting the discussion as is always the case to be based on the findings and not issues that are not captured in the findings. Thus the HIV/AIDS captured in the discussion section is problematic. More importantly these findings must be discussed in the light of other findings. It is curious to note that the whole discussion contains only two citations, and wondering the relevance of the first citation which is also not listed in the reference list. That is Samsamwater, 2011.	The discussion has been improved. The issue about HIV/AIDS has been deleted. The reference Samsamwater, 2011 has been added to the reference list. Other references have been added in order to qualify the findings and discussion.
