

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Agricultural Extension, Economics & Sociology
Manuscript Number:	Ms_AJAEES_31916
Title of the Manuscript:	Role of KASAM in Marketing of Organic Turmeric in Kandhamal district of Odisha
Type of Article:	

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Line 16: Is says: "The marketable surplus increased with increase in production", try instead: "The marketable surplus augmented with increase in production". Lines 36-37: Again, previous comment stands: The absence of fertilizer and pesticides use does not make a product organic. Proper certification by a recognized agency or third party is required. It is recommended to review your arguments. Line 54: you can suppress this line. Line 72: tables are still not self- explanatory. Table 1, for instance should say something like this: Table 1. Classification of Organic Turmeric farmers in Kandhamal district of Odisha, India. Same for all other tables. Also, categories are not self-exclusive, e.g. <1.00, 1.01-2.00, >2.01. Do the same for all the tables. Line 118: in the review form, but not in the text, you clarify that "Si. No" stands for "Serial Number". Please mention it somewhere in your manuscript. Also, in previous review it was suggested to perform a statistical descriptive analysis of variables included in table 3 (arithmetic mean $\pm$ standard deviation). Please include it since it will help to appreciate if apparent differences are real. To perform an ANOVA would be a plus. Lines 124-125: these two lines are redundant. Suppress them.	Complied Turmeric in Kandhamal is organic by default Suppressed Explained, as per suggestion Attended Mentioned Suppressed
