SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	A. Introduction Lines 25-27 need in-text citation. The introduction can also be enriched by either stating problems relating to job satisfaction of agricultural scientists in the study domain or by identifying gaps in literature that need to be closed on the concept. B. Literature review A study like this without literature review when there is extant literature is not acceptable. C. Material and Methods Methods can be made richer by stating the research design, population, method of sample size determination, reliability and validity of instrument, method of data analysis. D. Data analysis Simple percentage alone is not adequate for data analysis. It can be further enriched with descriptive statistics.	Have made corrections but this is my master degree original thesis paper, hence no instrument have been developed to test the reliability and validity. And also statistical method percentage analysis was fixed under the guidance and discussion with my chairman. So this method only finalized for thesis submission also.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
