	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Your manuscript Contribution of Animal husbandry to Indian Economy, its characteristics and future is very informative but to make it sound manuscript you must add more statistical data like Milk, meat and egg production. And mention current livestock data from GOI, animal husbandry department as you mention on 19th livestock basis which is old data. In abstract add some data to make it more clear and informative as your manuscript is the Contribution of Animal husbandry to Indian Economy. Introduction: In introduction you have mention Overall Indian livestock with respect to world and you have mention only India milk production data, animal husbandry not only contribute milk you must also add data of meat, egg and small ruminants data to make a good review article. Add the data in which India has good rank and production. Also mention rank of different species and their production with respect to world. Poverty alleviation and Employment generation: In this you must add how livestock helps in Poverty alleviation and how much Employment generation is through animal husbandry (add statistical data). There is lot of data available on employment generation through livestock farming. Also mention import export data of different livestock products and byproducts. Women empowerment: How much percent of women are involved in livestock activities and in which sector there is maximum contribution of women. Must add current data in your manuscript. You have enlist very old data of the year 1998. Integrated farming: Your manuscript is animal husbandry contribution to Indian economy, so you must mention which livestock based integrated farming models in most economical to Indian farmers. You can add to your manuscript which integrated farming system is more profitable to which agro-climatic zone of India and which type of integrated farming system is most profitable and provide more income, employment and food security. Source of Energy and Manure: Mention how much overall benefit or saving of money occurs through application of manure and biogas as fuel. Must add current data. Reforms need for future growth. • Add all the latest strategies and challenges and various initiatives for animal husbandry for more production • What are the different marketing and processing strategies that must improve the economy of India. What are the status and challenges that farmers are facing to overcome their constraints which hamper their production? • What are different improved animal husbandry practices that have improve the economy of India you must mention as you have one health care. Also add feeding breeding initiatives of GOI. Add more digital India programme for animal husbandry development.	Many data has been incorporated after going through reports from department of animal husbandry, central statistic office and economic survey.
Minor REVISION comments	Add more data to make your manuscript more informative and all the data must be current year data.	Data and information has been added.
Optional/General comments	The manuscript must be accepted only after making all correction as is very informative manuscript but it lack statistical data which must be added.	Statistical data has been included
