PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	ABSTRACT; For scientific paper abstract is a single paragraphed section, therefore authors should put into a single paragraph and not as it presented. There is no need to write Aim or design!! METHODOLOGY Lack the method of data analysis, what is presented is the way in which results are presented. The adoption studies fall under utility theory, so to capture well the utility obtained by famers from adopting coping strategies on climate change the categorical models are preferred. Therefore, I suggest the study to go further and regret the coping factors with the likelihood of farmers to adopt or not. RESULTS Table 1-5 should be inserted just after one paragraph to enable readers to follow easily the presentation and discussion of the results. Results on personal, socio-economic, psychology and others, it is better to present in paragraph and not discussing each characteristics or factor alone. This will make the paper to be more scientific and scholarly.	
Minor REVISION comments		
Optional/General comments
