

Editor's Comment:

below you can find my final decision regarding the manuscript Ms_AJAEES/_45493 with title "BEHAVIOUR OF PRICE AND ARRIVALS OF COTTON IN HARYANA".

The paper falls within the scope of the journal submitted. The topic of the paper is interesting and, to my knowledge, the manuscript describes original work. The study is appropriately structured and organized.

1. Introduction is very poor. The subject of manuscript is particularly popular and there is plenty of modern literature on both cotton and the product' prices.
-I suggest to the author/s enrich the manuscript with additional references (in the parts of introduction, materials and methods and to discussion which missing in generally from manuscript).
- I suggest also, the introduction improvement and at the end of introduction the author/s to added the purpose of the research and the structure of the paper.
2. To the part of materials and methods i suggest to add a sub-section that will present the study area (maybe is useful also to be add a map of the area). At the same part must author/s declare the criteria that chosen the specific production areas and their markets and if these areas are representative.
3. The indicators presentation is OK and the results well presented, too.
4. Author/s do not provide sufficient discussion comparing their results with the results of previous studies.

Author's Feedback:

1. The objectives have been explained in introduction.
2. Markets selection has been explained with data support.
3. Tried to add references and edited as per journal style.
4. To best the results have been compared with results of previous studies and given reasons for negative arrivals and delay in arrivals to the markets.
