

Editor's Comment:

I have read reviewers' evaluations and authors' corrections. The authors made the most of the suggested corrections in the manuscript. However, there are still a few corrections not yet done.

These are;

- In line 59, Plaised and Peterson [9] must be Plaisted.
- In line 36, "Most of Grain....." must be "Most of grain....."
- In Table 6, Mr. Watcharin Soonsuwon's suggestion about highlight of some values has not been done.
- Also, Mr. Watcharin Soonsuwon's another suggestion about circle each line in the Figures has not been done.

If the authors make these corrections I accept the article or the authors explain why they did not make these corrections.
