PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>In line 92 it says cytoplasmic males sterile (B lines). Unless they are using a different system. B lines are the maintainer lines and are male fertile. If that is not the case, they need to talk about the R line that was used for pollen!</p> <p>At least one reference in the ms was not included in the list of references; I did not check them all.</p>	It was a mistake. I corrected it. Actually, lines are maintainers (fertile).
<u>Minor</u> REVISION comments	See the returned ms with editing suggestions and a couple of sticky-note queries that might improve the paper.	Corrected
<u>Optional/General</u> comments
