PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is quite an interesting and original article which is based not only on excellent procedures but also on a great number of respondents involved. Besides, the revision of the previous literature is excellent and so is the discussion of results, which is backed up by a few supporting tables.	
Minor REVISION comments	The number of keywords (3) seems a bit scarce since a couple more could be surely added. And the conclusion also seems a bit short should we take into consideration all the previous data analysed along the article.	
Optional/General comments	Correct the minor spelling errors detected (8)
