PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	This MS deal with in vivo effect of aqueous extract (AE) of <i>Moringa</i> leaves on postharvest shelf life and the quality of tomato fruits inoculated with fungal pathogens. Author(s) suggested that AE treatment could increase shelf life and maintain quality of tomato fruits during storage. In 2.4 Extract concentrations, AEs are prepared by dissolving 80 or 100g of leaf powder in 100 ml of sterile distilled water. However, it does not dissolved completely in water as these concentrations are highest. Author(s) need to investigate using low concentrations of AEs again. References need to rewrite according to author's instruction as follows: http://www.sciencedomain.org/page/general-guideline-for-authors .	

PART 2:
