

Editor's Comment:

Even if the author said that he made all of the revisions, there are still some mistakes related with reference. In the text, there are 3 reference totaly but in the refernce list there are 7 references. How can we correct this problem? I think that I can not see. Plus, reference related with Chuku was showed as Chuku et all.2015 but this reference is belong to 2 author. Therefore it sholud Show as Chuku and..., 2015.

These are simple but important mistakes. In my opinion author have to fixed this problem. After this, because of the other revisions have been made by the author, manuscript can be accepted for printing as it was. There is no need to see again the manuscript for me.
