

**Editor's Comment:**

The academic editor checked the revised manuscript carefully. It is apparent that the 5th version manuscript has been improved according to the Editor Dr. Müge K. Davran's comments. So, the academic editor thinks it can be accepted for publication in Asian Journal of Advanced Research and Reports. However, there are still some items unfinished and recorded as follows:

1. The reference written by Loncke et al. is still not shown in this article (according to Davran's comments).
4. It is hard to find any theoretical or experimental originality in this article. Hence the manuscript is more suitable for being a "short Article."

**Editor's Details:**

Dr. Shao-Yi Hsia  
Professor, Department of Mechanical & Automation Engineering, Kao-Yuan University, Taiwan, R.O.C.
