**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The conclusion of my review is "Minor revision required". After revision, I suggest to publish this paper.	
<b>Minor</b> REVISION comments	-Give the details of methods	We feel that detailed description of the methods as suggested by the reviewer may not be very necessary as they were all standard methods of analysis. Secondly, it is clearly stated in the information guide for authors that already published methods should be mentioned with reference. Thirdly, it will make the manuscript to be far more than the maximum pages stated in the author's guide.
<b>Optional/General</b> comments
