PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	Oral lesions induced by smokeless tobacco is a topic in dentistry. Since smoked tobacco is prevalent in developed countries, chewed tobacco is more widespread in developing countries. This habit causes the onset of precancerous lesions on the oral mucosa, which can quickly evolve into cancer if the habit is prolonged over time. Therefore the description and monitoring of these lesions is of great importance for the prevention of oral carcinoma. This manuscript is within the scope of this journal. The Informations contained in the manuscript are original. The references are appropriate and current. Grammar and style are adequate. The title of the article is clear and attractive to readers. The keywords represent the content of the article accurately. The references are cited correctly, listed in the required style and relevant literature is quoted. Overall scientific priority is high.
