PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The authors present a case of rupture of the bladder after consumption of alcoholic beverages. Due to the alcoholic intoxication of the patient it was not possible to obtain details about what happened with the patient. The authors speculate the possibility of rupture having been caused due to weakness of the bladder wall after rapid filling by the diuretic effect of the alcohol. The other plausible hypothesis would be increased abdominal pressure due to nausea and vomiting. Text English needs to be improved. The figure must be changed since the CT image shows nothing.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
