

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Case Reports in Surgery
Manuscript Number:	Ms_AJCRS_43714
Title of the Manuscript:	A RARE CASE OF GALL STONE ILEUS WITH OBSTRUCTION OF SMALL BOWEL
Type of Article:	Case study

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Thank you for the revised manuscript. Several improvements can be found. On the other hand, I think that this manuscript still has some problems as indicated below.</p> <ol style="list-style-type: none"> 1. The discussion lacks focus on the case the authors are describing. This discussion was only reviewed about past reports of gallstone ileus. Therefore, I cannot find significance of reporting this case. The authors should describe their message obtained from this case in discussion. 2. Introduction should be included some references, not in abstract and discussion, to provide factual background and clearly defined problems of gallstone ileus. 3. The authors should clearly show the figures. Lines and points which were not necessary were stated in figure. The authors should delete it. And, it is better to avoid handwriting. 4. References should be prepared in single column format and should be indicated by using same format.
