PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This research work must provide the coordinates of each filling stations i.e Longitudes (E) Latitudes (N) (Line 103) The pattern of the distribution (clustered, Scattered and Regular) of filling stations must be provided. And the factors that are responsible for the pattern. Display the GIS database of the filling stations. More queries are required with their interface. Your methodology is not details. This research work needs more maps with point settlements.	Thanks for your review The coordinates of the filling stations have been added The pattern of the distribution of filling stations has been spelt Every other corrections have been made.
<u>Minor</u> REVISION comments	The number of your filling station is too small, you can extend your study area. The two maps provided are spatial distribution of filling stations. Conformity of the filling stations is also necessary, using line 39 – line 50.	The number of filling stations has been increased. A map showing an example of query carried out has been added The scope of this work does not include checking for conformity of the filling stations with the regulations guiding their establishment.
<u>Optional/General</u> comments	Nil
