

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Geographical Research
Manuscript Number:	Ms_AJGR_44625
Title of the Manuscript:	SPATIAL DISTRIBUTION OF FILLING STATIONS WITHIN AFIKPO METROPOLIS USING GIS AS A TOOL
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Authors of the paper "SPATIAL DISTRIBUTION OF FILLING STATIONS WITHIN AFIKPO METROPOLIS USING GIS AS A TOOL" have not improved the paper as suggested by the reviewers. The first concern is that this paper is more like technical paper more than a scientific paper. The authors should convince readers why their paper is different from other similar papers. In other words they should focus on the new ideas they developed compared to other literature instead just writing briefly about other's work as suggested by the reviewer. Another issue the title should be more appealing and general as suggested by the reviewers. Create a discussion part in which the authors discusses their findings and the difficulties they encountered in creating their database and if this can be applied to the country's filling stations and what are the requirements. They should ask the question what can be added to this application to increase its efficiency and give answers. Another issue is to point out to the importance of using geospatial technology and what could be the alternatives if there is one. Try in the literature review to start with short sentences which include the author last name instead of starting with the reference number and arrange them in similar topics and make one analysis and conclusion about them.
