

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	Ms_AJEA_20434
Previous Title of the Manuscript:	COMBINING ABILITY STUDY ON HEAT TOLERANT TOMATO (Lycopersicon esculentum Mill.) IN YOLA.
New Title of the Manuscript:	COMBINING ABILITY OF YIELD RELATED TRAITS AND GENE INTERACTION ON TOMATO (Lycopersicon esculentum Mill.) IN YOLA
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Authors must provide some information in the methodology. Below are some questions that need to be answered by authors to improve the manuscript. What kind of lines and testers did you use on each bed? Why did you proceed thus? Did the lines and testers used for crossing come from beds? What did you call location 1, Rep x 3 location, entries 1, parents 5, crosses 7 ? You must provide information on these in the methodology. Authors must avoid mistakes in all the manuscript.	The reviewer asked some questions concerning; Location 1, Rep x location 3, crosses 5 and crosses 7. These are sources of variation and their corresponding degrees of freedom. The are constants with formulas....eg The experiment has 2 locations so it is " location n-1 = 1.....same with rep r-1 = 3.... crosses n-1 =5 because there were 6 crosses. All other corrections have been made in the methodology as reviewed. Thank you for your patience.
