

SDI Review Form 1.6

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	Ms_AJEA_22347
Title of the Manuscript:	Production and Qualitative Aspects of Tomato Fruits under Foliar Fertilizer Applications with Resistance Bioinducers
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	This study is of importance because of the following: 1- The importance of nutritional supplementation in increasing the fruit dimensions. 2- The importance of organic compounds that have the function to optimize the absorption of the nutrients in the solution led the foliar fertilization more efficient. 3- The lower incidence of pathogen attack due to the application of foliar fertilization. 4- The foliar fertilizers plus the resistance bio-inducers promotes significant increase in tomato production and fruit size without changing the qualitative aspects. 5- These results are of great interest to the food industry.	Dear Mr. Reviewer, thank you for your valuable contributions, especially considering our relevant manuscript for publication in this journal, reflecting the advancement of science and technology.
