PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors changed most of corrections. I have several notes that the way to treat them is been left to the editor. - There is one place that the authors did not change the units into the right presentation line 13- 16.50 fruits should be plant 13- 16.50 fruits plant⁻¹ - In line 36 the authors noted Cofie et al., (11); Based on your journal policy it should not be as Cofie et al., 1999(11)? - There are small mistakes mainly of words without space in the text, tables and Figures - Fig. 1 the legend of Yaxis should be [Fruits plant⁻¹]. Again based on the journal policy, do you demand '[' or '()' brackets? For axes legends? - The authors did wide work and collected lot of data, so they should bless! But why in the figures they are not presenting the results with their confidence based on ANOVA? In my papers I used small letters on bars as followed. It is high visible and save text! (A) (B) (C)
