

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2014_AJEA_13561
Title of the Manuscript:	The Use of a Protein Enhanced Surfactant to Increase Yield of Alfalfa
Type of the Article	Short Research Article

PART 2:

Editor's Comment:	Authors' response
The article is not suitable for consideration for publication even after four revisions. The research topic is on aspect how to enhance water holding capacity of soil. The surfactant can be an amendment in soil. The reviews that indicated no effect of amendment had been non ionic. But, the amendment here is useful in some non ionic soils such as sandy loam and loam. The ion creating amendment having some strength to bring positive effect in crops with exhaustive adventitious /fibrous roots, instead of tap roots, as it can maintain more contact with the soil particle with some charge. Hence, the amendment can bring some ability to bear the stress of drought condition. These are the pre cursor of knowledge to write research article on the amendment like the product in this study. The write up is discrepant in writing as brought out below. Abstract: Author should give the need of study, hypothesis, objective, experiment-material and Method ,result ,discussion and final conclusion and recommendation. Introduction: need of research, what has been done, how the problem can be solved, what is your hypothesis, what is the objective Experimental: The site, treatment, plot size, sampling sites, no of samples, observation, and data analysis. The experimental details of repetitive nature be given in table form. Results: write about different aspects of finding with support of data. How research is conforming with others and why? Discussion: What you have observed and how does it fulfil the objectives and implicate the hypothesis. What new issue develops in the research area and how it can be resolved. Conclusion: Give conclusion from your own study. Then indicate some researches to fulfil the gap. The subject matter involves subject knowledge to writ thse aspects about the research topics. The authors should follow these steps and infuse a scientific writing.
