

Editor's Comment:

Please find below my decision:

Considering the detailed assessments of the revised paper from experts in the field, I agree that the work is valuable and worth considering for publication in American Journal of Experimental Agriculture. The revision addressed the questions raised by the reviewers and was clearly improved with respect to the initial submission.

Nonetheless, I still have some minor questions that remain to be addressed before the manuscript can be accepted for publication:

To the authors:

- 1) Abstract: Please include (USA) after "Alabama"
- 2) Main text: "United States (U.S.)" should be "United States of America (U.S.A.)"
- 3) First line; page 2: remove bold-face from the "t" in "team"
- 4) All figures: Legends must be more informative
- 5) Please improve the legend to Fig. 1 (make it more informative) and highlight the cities that hosted the workshops in the map. Please move the legend close to the Figure. The cite the accessed website accordingly to standard rules
- 6) Page 3: "Organic Food Survey (OFS) and Questionnaire of Purchase Intent (QPI)" bold face in "Questionnaire of" required
- 7) Fig. 2 – Please make the legend more informative. I fail to understand why the standard error??/deviation?? (make it clear in the legend) bar of "session content" is not linked with the bar
- 8) Reference [15] must be deleted from the list

To the editorial office:

- One of the reviewers raised a doubt about possible plagiarism. I ask the Editorial Office to run the MS in "plagiarism" software to exclude this hypothesis prior to publication.
- All Tables must be published using the same format (and not as they appear in the submitted MS)

I suggest that the authors are given the opportunity to answer to these questions before publication.
