

Editor's Comment:

The final decision for manuscript number Ms AJEA 24071 entitled 'Genetic variability of pigeonpea (*Cajanus cajan* (L.) Millsp.) for water logging and salinity tolerance under *in vitro* and *in vivo* conditions' written by Sarveet Singh, Pooja Grover, Jagmeet Kaur, Inderjit Singh, Jasdeep Kaur, Pritpal Singh, OP Choudhary, Anupama Hingane, CV Sameer Kumar and KB Saxena

Following evaluation of all documents related to the manuscript I agree with the Reviewers that the manuscript is acceptable for publishing in American Journal of Experimental Agriculture. The text was amended in accordance with reviewers' requirements and suggestions. However, additional correction is still needed.

1. Key words must be changed because they should not be the same as words used in a title. Currently all keywords there are in the title.
2. The manuscript must be arranged according to the Journal requirements. Authors must carefully read the "Author's Instruction" (available at <http://www.sciencedomain.org/page.php?id=general-guideline-for-authors>) and change the manuscript according to this instruction. I recommend using 'MS word SDI paper template' which can be downloaded from above-mentioned web page. The most important corrections needed are:
 - literature cited in the text must be numbered and references must be listed at the end of the manuscript in order they appear in the text, not alphabetically
 - the sections and subsections must be numbered
 - after Conclusion, two additional subsections (COMPETING INTERESTS and AUTHORS' CONTRIBUTIONS) must be added
 - list of references needs special attention. It must be arranged according to the Journal requirements.

My decision is: Accept after correction and after rearrangement the text according to the Journal requirements.
