

Editor's Comment:

The final decision for manuscript number Ms AJEA 25620 entitled 'Population dynamics of *P. brassicae* on different cauliflower genotypes' later 'Population dynamics of *Pieris brassicae* (Pieridae: Lepidoptera) on different cauliflower (*Brassica oleracea* L. var. *botrytis* L.) genotypes' written by Amna Sadozai, Imtiaz Ali Khan and Ahmad ur Rahman Saljoqi

Following evaluation of all documents related to the manuscript I agree with two Reviewers that the manuscript is acceptable for publishing in American Journal of Experimental Agriculture. The third Reviewer recommends rejection of the manuscript because of lack of novelty of the research. However, a lack of novelty of a research is not a criterion for rejection of manuscripts submitted to journals of SCIENCEDOMAIN International.

Although, the manuscript is significantly improved comparing to the original submission, minor correction is still needed.

1. Key words must be changed because they should not be the same as words used in a title.
Currently some keywords are the same as words in the title.
2. Subsection AUTHORS' CONTRIBUTIONS must be corrected because the manuscript is written by three authors, not by two authors.

My decision is: Accept after minor correction.
