

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	Ms_AJEA_20371
Title of the Manuscript:	Estimation the Degree of Diversity for Some Iraqi Wheat Varieties through ISSR, SRAP and RAPID Markers

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
There is still several places there the spaces between words differ. There is also several inconsistencies in leaving line open after sections e.g. at Electrophoresis and statistical analysis sections. It can be due to reformatting. Introduction: "Wheat (Triticum aestivum L.) is one of the most and dominant cereals in the world and Iraq." Please rephrase. Materials and Methods: Authors already started to discuss the results in the materials and methods section. "The experiments were conducted at Crop Research Laboratory / Dept. of Agronomy and Horticulture/ University of Nebraska/ USA." Avoid the use of the forward slash, please rephrase. There is no reference to table 2 and 4 in the text of the table. Results And Discussion Figure 1 and 3 is nor referred to in text. It will be helpful if authors elaborate on the use of RAPDs. It is not popular anymore due to its low repeatability. However it is relative cheap and easy. References Akkaya in text does not have a year with it Format of the references need to taken care of. Some of the initials of the authors are in lower case. General It might be easier to read if the combine some of the headings. Manuscript seem very fragmented and the paragraph that bind all the results together is not under a separate heading. It can be placed under conclusion. There is also too many tables. It is not necessary to publish the sequences of commercially valuable primers	Corrected Rephrased Rephrased All tables and figures were mentioned in the text Formatted of the references
