SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	<i>Authors are required to add / amend followings:</i> • Title: Effect on Cacao developmental pattern, soil temperature and moisture variation on account of shade and dry season drip irrigation. • Discusion is to be replaced as: Results and Discussion • Authors did not write any CONCLUSION of the research findings. Thus sub section Conclusion is to be added and point wise concluding remarks are to be mentioned for the current research work.	The present title of the manuscript is believed to be okay by me because it pointed out the research focus directly. I agreed with the reviewer though, the two subsections can stand on their own. Conclusion section have been added.
<u>Optional/General</u> comments
