

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	Ms_AJEA_24292
Title of the Manuscript:	Salt-tolerant triticale (X Triticosecale Witt) cultivation in Jordan as a new forage crop
Type of Article	Short communication

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors accepted the suggestions of all reviewers and the work has become much more fulfilling. As only observation: the authors include a graphic in the new version of the manuscript that I suppose was a suggestion of other review. These graphic are not mentioned in the text. I suggest include the same on the text of manuscript.	(Mai_v1_1): Please check the sentence which was added to the tail of first paragraph in (Results and Discussion) that pointed the graph with some illustration. The results in (Graph 1) indicated those differences for collective dry grains and straw yields (ton/ha) of harvested triticale and barley for two locations among two growing seasons (2011-2012), and (2013- 2014) (Mai_v1_1) . Specific Note: First line of acknowledgments was added.
