

Editor's Comment:

There are many typographical errors in this manuscript and some of the references are too old.

Author's Feedback:

Well, my great respects to the editor response:

First:

- Everything noticed as a typographical error corrected directly:

Page 1 (4 comments), Page 2 (1 comment), Page 3 (7 comments), Page 4 (3 comments), Page 5 (5 comments), and Page 6 (1 comment) **(All of them highlighted in blue).**

- Please note that each dot followed by a single space and started with a capital letter, as well as each paragraph started with a capital letter.
- Please note that each reference cited and listed according to 6th APA style referencing.
- **Eventually, any error noticed by you and not changed was only not noticed by authors.**

Second:

For the old references:

All of the references remained were the one's published after 1989. The only which were deleted were the two references:

4. Cherney and Marten. (1982). Means of two varieties, years and locations. University of Minnesota and USDA.

7. Francois, L. Mass, E. Donovan, T., & Young, V. (1986). Effect of salinity on grain yield and quality, vegetative growth and germination of semi-dwarf and durum wheat. *Agronomy Journal*. 78: 1053-1058.

Please, note that references were listed and numbered again after this modification.

Please, note that reference number 13 is very critical and cannot be removed or alternated. This attributed to specific citation of its information within the structure of paper.
