

SDI Review Form 1.6

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	Ms_AJEA_22538
Title of the Manuscript:	Impact Of Preceding Legumes And Nitrogen Fertilizer On Soil Fertility And Growth Attribute Of Maize
Type of the Article	Original Research Paper

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The abstract should be written stating the problem statement, providing more details on the methodology used, presenting major findings in a more logical manner and ending with conclusion. The Materials and method section is economical with relevant details and should be presented in a more logical order. Soil properties such as N, P, K, bulk density, infiltration etc. Could be very informative and relevant to this study. The results presented could not justify the conclusions drawn there from. Data on biomass production, chemical composition of the biomass and the quantities of the previous legumes incorporated before the cultivation of maize should be provided. Data on the initial soil properties of the experimental site will be very useful for the interpretation of results. Other comments/suggestions are embedded in the MS in track changes	
<u>Minor</u> REVISION comments	Language editing	
<u>Optional/General</u> comments
