PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The results do not show adequate discussion. The research with lethal yellowing disease is not recent. There have been many studies on the subject while the author should refer to these more recent works, not as old as he did. It suggests updating references. The author uses old references, suggested upgrade of at least 70% of references. We recommend using at least 15-20 references in order to improve this paper. They are not localized references 1, 4, 11 and 12 in the text. References in the document are not presented in chronological order. Pag 13 Line 279 The references Díaz and Villareal 1990 it's incorrect. Is Yucatan not Yucata. Review the rules of General Guideline for Authors of this journal again.	
<u>Minor</u> REVISION comments
