

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	Ms_AJEA_26402
Title of the Manuscript:	STUDIES ON HETEROSIS FOR HEAT TOLERANCE IN TOMATO
New title:	STUDIES ON HETEROSIS FOR SUMMER SEASON TOMATO PRODUCTION
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The paper was improved in its formal presentation. but not in its scientific quality. Moreover, authors stated in their feedback comment "We are previously another manuscript where SCA, GCA will be presented ", which implies that they recognize the lack of significance of the results presented in the present paper and also the lack of originality and novelty. However, the editorial board indicates that "This journal's peer review policy states that <u>NO</u> manuscript should be rejected only on the basis of ' <u>l a c k o f N o v e l t y</u> ', provided the manuscript is scientifically robust and technically sound.". So, I will recommend the paper for publication, though it is on the border of the scientific literature.
