SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Article has a reasonable range, good formal aspects and character of a research article.	
<u>Minor</u> REVISION comments	The article title should be adjusted. I do not see meaning in the words "and Botanical" in the main title, in sub-titles, in the keywords, nor in the texts of article. What does it mean symbol "@" in the whole manuscript? The methodology to be supplemented by the numbers and names of the varieties, the number of repetitions, dates of fruits sampling for analysis in 2014 and the 2015th. The methods require indicate analysis methods, and the use of devices for the analysis (TTS * Brix, Ascorbic acid content and acidity). How they were applied to 10 years old trees the growth regulators (IAA, GA) and other solutions? Conclusion must contain a summary of the results and recommendations for growers.	
<u>Optional/General</u> comments	Scientific article must have the conclusion. Article may be modified, thus increasing its value.
