

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2013_AJEA_4929
Title of the Manuscript:	The Relationship between Phenotypic, Testicular Traits and Serum Testosterone Levels in Pre-pubertal Male Boer Goat Crosses

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors did not address the issues to meet the criteria for publication of this paper. There were several suggestions that were made to make this paper publishable, instead of rejecting it first time around. However, the authors did not make the requested changes by the third revision and I therefore do not recommend that this manuscript is accepted at this stage. The scientific content is justified and the study is well executed, but the presentation of the work is not at the level that is required for publication yet. I would like to encourage the authors to revise the paper accordingly, using the suggestions made by the reviewers and try to publish it at another stage.
