| <b><u>Compulsory</u></b> REVISION comments | <p>In my opinion, the manuscript meets almost all the requirements to be published in the Journal, i.e. it covers a relevant subject, suitable for the Journal, through proper methodology, in addition containing a good review of the literature.</p> <p>That said, the only major suggestion of mine is that the last section does not merely present the conclusions but also include those that the authors consider to be the (main) limitations in the manuscript, as well as indications for further analysis.</p> | <p>I have add limitations and further research orientations at the end of the paper</p>                                                                                       |
