SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	- In the "abstract", aims, study design, plan & duration of study, methodology and research findings should be collapsed in one paragraph and not segregated as it is currently done. Conclusions and recommendations should also form part of the abstract. - In line 41, cite examples of the authors. - In line 52, cite examples of some of the companies. - What is the direction of correlation between inventory control system and operational performance in the study conducted by (10)? Is it positive or negative? You need to be specific. - In line 193- 194, expunge "of his study". The regression result indicated ----- is sufficient. You don't need to say "regression result of his study". - In your methodology, you don't need to explain the meaning of survey and primary data. Simply explain why you think survey is appropriate for your study. In a similar vein, tell your readers the type of primary data used and it advantages over other techniques not used. - You combined primary and secondary data in your analysis. You need to provide a justification for doing that. You don't need to assume that your readers will know the reasons for doing that. - Justify your choice of distribution and wholesale businesses in Ghana. - How is age measured in this study?	This has been addressed from line 7 to 27 Examples of authors cited in line 41 Examples of companies cited in line 52 Direction of correlation stated in line 178 Correction made in line 194 to 195 These suggestions have been effected from line 207 to 210 The type of primary data used and its advantages provided from line 212 to 217 Justification for using both primary and secondary data provided from line 220 to 224

SDI Review Form 1.6

	- Effects, impact and relationship have been used interchangeably. The 3 terms are not the same in research. You need to be consistent. - You have not discussed age and size as your study variables. You need to briefly discuss them since they are included in your model.	This is provided in lines 227, 228 and 229 This is stated in line 287 The corrections have been effected throughout the work. See lines 271, 389 and 418 The age and size are discussed from line 276 to 284
Optional/General comments
