PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Please check them in English and grammar in the section of abstract, literature review, empirical results, and conclusion. It is very hard to read.	I really appreciating your valuable comments for improvement of my research paper. The eager to submit before date resulted these mistakes and it is attended to the level possible.
Minor REVISION comments		
Optional/General comments	I think that the topic is very important and interesting. I also think that the paper fits with the aim and scope of the journal. This research is considered to have proceeded well in logic development, research composition, and research methods. It seems that researchers have made a great effort to write a paper.	The review comments like this and the regular response from the journal made me to submit this third research paper on a continuous basis without break.
